

STOP CORONAVIRUS FROM SPREADING

REDUCE VIRUS ON SURFACES AND IN THE AIR

Coronavirus is known to spread from human to human rapidly. The number of infected increases daily and globally millions of people are confirmed infected with the virus.

Authorities shut down factories to avoid that people gather in big crowds and people are afraid of traveling with airplanes and cruise liners. The coronavirus is paralyzing many businesses and especially the travel industry.

JIMCO A/S is specialized in some of the worlds most unique and environmentally friendly air purification technologies and has a broad portfolio to combat the spreading of the coronavirus or any virus for that matter:

The JIMCO technology is based on UV-C and ozone, which is a natural way to reduce and eliminate unwanted viruses and bacteria.

JIMCO OZ1000

JIMCO OZ2000

JIMCO®UV-C & OZONE
TechnologyREDUCE
VIRUS WITH
99.84%

EFFECTIVE DISINFECTION IN ...

- ✓ Residential homes
- ✓ Car Dealers
- ✓ Hotels
- ✓ Painters and Decorators
- ✓ Restaurants and Discos
- ✓ Apartment Buildings
- ✓ Police Stations
- ✓ Village Halls
- ✓ Crematoriums
- ✓ Trucks
- ✓ Waste Water Treatment Plants
- ✓ Damage Control Companies

WARNING!!!

People or animals must not be present in the room or area being treated with OZ 1000 or OZ 2000.

Designed to
effectively decrease the
spreading of any disease
in rooms and areas without
the presence of people.OZ2000 TEST RESULT
AUGUST 2020**Reduction of 99,84 % of Vaccinia virus**
(the most resistant enveloped virus. All corona
viruses are enveloped viruses).This means that reduction of SARS-CoV2
will minimum be the same.

decontamination time	disinfectant	Concentration	carrier	log ₁₀ TCID ₅₀ /ml	average log (geometric)	RF
240 min	ozone	max 1.68 ppm	carrier - 1	2.75	2.79	2.63
			carrier - 2	2.75		
			carrier - 3	2.88		

Test setup was 4 hours treatment in 31 m3 room. OZ2000 reached 1,68 ppm. The room was NOT disinfected before start, the window was open 2 hours before test start which would have increased the amount of airborne microorganism before test start. This test is very close to what happens in reality.

REMARKABLE SANITIZATION
RATES ON SURFACES**Vaccinia Virus (MVA)****99,84 %****Staphylococcus aureus****97,812 %****Enterococcus hirae****83,782 %****Escherichia coli****95,926 %****Acinetobacter baumannii (bactericidal)****99,224 %****Candida albicans (yeasticidal)****98,878 %****Aspergillus brasiliensis (mold)****20,567 %****Salmonella typhimurium****96,48 %****Listeria Monocytogenes****99,61 %****Mycobacterium terrae****99,993 %****Mycobacterium avium****99,997 %**

In Europe, Modified Vaccinia Virus Ankara (MVA) represents the official model virus for all enveloped viruses, therefore the conclusion can be drawn that after passing examinations an activity against all enveloped viruses including members of the virus family coronaviridae (like MERS-CoV, SARS-CoVI and SARS-CoV2) is achieved.
