

CREATE A HEALTHY INDOOR CLIMATE

EFFECTIVE AIR PURIFICATION WITH THE MAC500C

- ✓ Environmentally friendly
- ✓ Easy to mount
- ✓ Removes odor
- ✓ Runs 24/7

GOOD INDOOR CLIMATE IN NEW CONSTRUCTIONS

FRESH AIR RIGHT FROM THE BEGINNING

JIMCO has developed an air purifier for ceiling mounting in new constructions. As soon as the construction is finished, a good indoor climate is secured for everyone.

The air purifier MAC500c cleans the air from bacteria, virus, and odor with up to 99,9% within 3 hours (depending on room size).

Residents and guests in the construction can feel comfortable and have a great indoor climate experience.

A good indoor climate is important for everyone's health and well-being. MAC500c will make an efficient difference for everybody.

MAC500C MOUNTING

By mounting the air purifier in the ceiling, the MAC500c will run 24/7. It will work as a grate in the ceiling and will not be further noticed than a lamp hanging from the ceiling.

TECHNICAL DATA

UV Lamp: 1X8 W
Voltage: 230 V
Power consump: 25 W

Operation lamp: 8000 hours
Room area: 60 m³
Weight: 3,2 kg.

Length: 578 mm
Depth: 86 mm
Width: 204 mm

The MAC500c has been documented to reduce airborne virus.
But the MAC500c should not be the only measure in the fight against the pandemic.
It is important to still follow all guidelines from authorities.
